

# Automatic and intelligent observability for hybrid multi-clouds

Cloud observability and clear answers on one platform.

## Software Intelligence Platform

-  Application performance management
-  Infrastructure monitoring
-  AIOps
-  Digital experience management
-  Digital business analytics

## What makes Dynatrace unique

### Full stack observability

See your entire environment in context, and instantly know how every cloud, container, and application connects.

### Continuous automation

Spend less time mapping and managing, with zero-touch configuration and automated, continuous discovery.

### AI-powered precision

Solve issues in seconds (or before they start), with real-time answers that grow even smarter over time.
