

# Introducing the all-new Dynatrace

## Software Intelligence for the Enterprise Cloud

### All-in-one

One solution for your hybrid, multi-cloud environment including application performance, infrastructure, digital experience and AIOps

### Fully automated

Deployment, configuration, updates, problem detection and root cause analysis

### One Agent

A single agent that auto-configures itself for the technology it's deployed on, including containers

### AI

AI-powered causation that eliminates alert storms to provide the answers you need fast

### Full Stack

Real-time topology of all relationships and inter-dependencies that make up your cloud environments

Pivotal

“Finally, a solution  
purpose-built for  
the enterprise  
cloud.”

- **Mike Legg** |  Transurban

App development for one of the world's  
largest road network operators
