

Monitoring as a Service (MaaS)

Automatically deliver and scale observability across your SDLC for multiple cloud environments, stakeholders, and applications

Monitoring as a Service (MaaS) leverages automation to scale Dynatrace across your organization

This engagement applies proven best-practices to your Dynatrace implementation to scale on-demand observability enterprise-wide, across your entire SDLC, and across hybrid cloud environments.

Dynatrace ACE Services Architects will guide you to automate Dynatrace OneAgent deployments and implement advanced, time-tested configurations to maximize coverage and provide automatic monitoring. These Dynatrace experts can also integrate Dynatrace with your CI/CD platforms and supported testing tools to automate and scale onboarding of critical applications and services.

Prerequisites:

- Dynatrace must be fully deployed in your target environment(s)
- Configuration Management toolset should be in place
- A functional CI/CD pipeline should be in place for your targeted application
- Automated testing should be functional for your target environment(s)

Outcomes

- Dynatrace OneAgent automatically deployed and integrated into your environment
- Automatic configuration and enrichment of Dynatrace metadata enabling downstream workflow automation
- Automated user configuration capabilities to provide scalable self-service dashboarding, alert definition, and much more
- Self-service Dynatrace Configuration Deployment capabilities

**Observability
and AIOps**

**Enterprise
Scale**

**Self-Service
Monitoring**

Your Dynatrace experts

Dynatrace ACE Services Architect

A Dynatrace ACE Services Architect is a senior-level Dynatrace resource that leads and delivers cloud automation services. Dynatrace ACE Services Architects are experts in Dynatrace technologies and modern software delivery concepts.

About Dynatrace

Dynatrace exists to make the world's software work perfectly. Our unified software intelligence platform combines broad and deep observability and continuous runtime application security with the most advanced AIOps to provide answers and intelligent automation from data at enormous scale. This enables innovators to modernize and automate cloud operations, deliver software faster and more securely, and ensure flawless digital experiences. That's why the world's largest organizations trust Dynatrace® to accelerate digital transformation.
