

Business Analytics for Healthcare

Exceed consumer expectations for greater control over healthcare technology and delivery options

Today's healthcare consumers expect online access to patient history, test results, care routines, and billing. Unifying the patient experience earns trust, fosters engagement, and improves care outcomes. From patient portals and chatbots to telehealth systems and bedside devices, new digital channels are fast becoming critical to efficient healthcare delivery and patient satisfaction. Yet most healthcare providers struggle to provide a unified experience across the end-to-end customer journey.

Ensure patient experiences meet the expectations of digital natives without alienating digital immigrants

Visualize every patient touchpoint in context to ensure frictionless patient experiences, enhance patient-provider trust, and improve provider efficiency.

Let Dynatrace deal with complexity so you can focus on innovation

Implement automatic and intelligent observability across multi-cloud and hybrid cloud environments to proactively improve your tech stack where it matters most. Leverage AI-powered answers for issues and optimizations so you can stay ahead of regulatory changes and healthcare reforms.

Prioritize and understand business impact

Understand impact to patients, critical care services, and the bottom line to prioritize optimization and troubleshooting efforts.

“Looking at the numbers from the last peak season, we achieved levels of availability we’ve never been able to hit before. It’s been an amazing journey to get there. **Ultimately, we don’t do anything that matters without Dynatrace.**”

— Chief Architect
Large healthcare company

Dynatrace supports all healthcare information systems, including:

- EMR/EHR
- Practice management
- Patient portals
- Remote patient monitoring
- Clinical decision support
