Platform Extensions

Extending Dynatrace throughout your technology stack and workflows

Description

Dynatrace extensions increase your ability to leverage world-class monitoring and performance management capabilities throughout your enterprise.

Extensions bring Dynatrace monitoring to software and hardware solutions that were previously inaccessible through the OneAgent, as well as provide deep integration with the services that drive your business, operational, and technical workflows.

Unlike Gen1 and Gen2 monitoring tools, extensions are holistically integrated into our AI and data models providing insights, not just metrics. Extensions augment your existing operational and technical workflows by enriching these processes with data from Dynatrace increasing the visibility into your environment.

Offering components

- Trainings
- Extensions
- SDK
- OpenKit
- API middleware
- Alert notification integrations
- CMDB integrations
- Custom dashboards
- Custom alerting

Extend Dynatrace into your ecosystem

Get visibility into your ecosystem at inflection points critical to your performance, and use these insights to make smarter decisions

Minimize development costs

Focus your development efforts on your applications and allow Dynatrace to build your integrations

Best practices workshops

Attend a private session with one of our experts to learn everything you need to know on how to extend the Dynatrace Platform

Customized monitoring

Adapt your monitoring to your ecosystem, and not the other way around.

Your Dynatrace experts

Platform Extensions Team

The Platform Extensions team is a global team consisting of architects and subject matter experts on all things Dynatrace. The team is also responsible for the architecture, development, and support of all turnkey extensions such as f5, DataPower, IBM MQ, SAP, Citrix, and more.

Dynatrace Services

The global reach of Dynatrace Services means that you have access hundreds of additional resources worldwide to help drive value from your deployment. Powered by Collective Intelligence; by tapping into this network, you can find answers quicker and drive more value from Dynatrace.

About Dynatrace

Dynatrace exists to make the world's software work perfectly. Our unified software intelligence platform combines broad and deep observability and continuous runtime application security with the most advanced AIOps to provide answers and intelligent automation from data at enormous scale. This enables innovators to modernize and automate cloud operations, deliver software faster and more securely, and ensure flawless digital experiences. That's why the world's largest organizations trust Dynatrace® to accelerate digital transformation.
