

Building Resiliency into the DevOps Cloud

Software intelligence for unbreakable continuous delivery

-  End-to-end coverage
-  Superior data collection
-  Causation-based AI engine
-  Powerful auto-remediation

What makes Dynatrace unique

Fully automated

With zero-touch configuration, continuous discovery and mapping, you can jump-start with out-of-the-box results!

Full stack

Automatically see all components and dependencies in real-time, including microservices running inside containers.

AI-powered

Powerful AI-driven software intelligence platform provides real-time precise data and contextual answers.

Broadest technology support

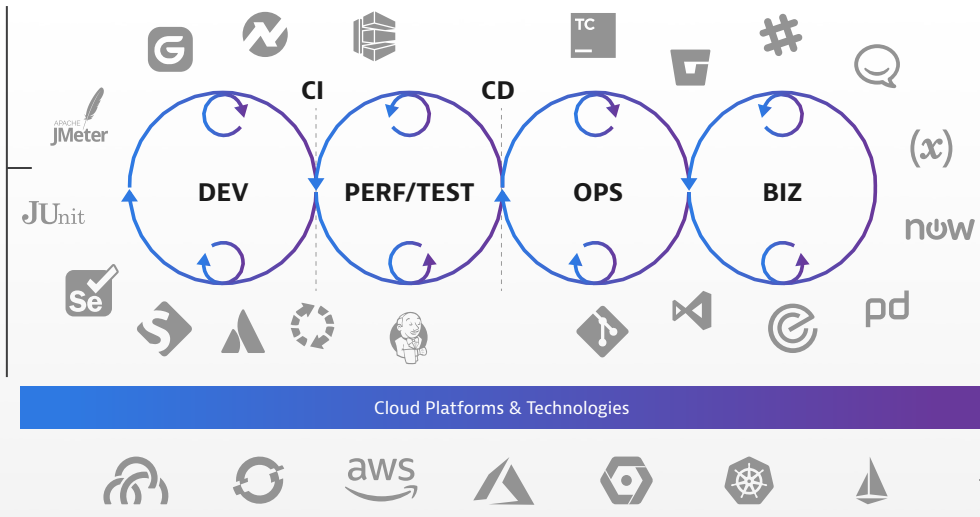

Engineered for cloud native and hybrid environments, Dynatrace covers your complete ecosystem automatically—from microservices to traditional applications.

Beyond APM for unbreakable continuous delivery

All-in-one, AI-powered monitoring and automation for DevOps cloud apps and infrastructure

Deep visibility across the end-to-end application chain, along with automatic performance and contextual analysis, allow both dev and ops to collaborate easily, understand issues, and resolve them quickly.

- Automatic and continuous deployment** of Dynatrace OneAgent to all components
- Real-time auto discovery** through OneAgent injection of PAS and PKS containers without code or image changes
- Monitor, analyze and optimize** every digital interaction
- Full integration** with all major cloud platforms

The unique advantage of Dynatrace AI enabled automation for unbreakable continuous delivery

Dynatrace integrates the entire DevOps tool chain and ingests all tool chain data into the Dynatrace AI platform. This empowers you to:

- Shift-left and build quality into CI/CD versus repairing issues in production
- Auto-remediate issues and auto-update ticket system on problem / remediation action details
- Shift-right and execute auto-remediation-as-code baking resilience right into the code pack

The integration with a variety of CI/CD, ITOM, workflow and cloud configuration technologies enable automated problem resolution and performance optimization.

“The AI paves the way for autonomous operations, enabling us to create auto-remediation workflows that remove the need for human intervention.”

— Jonathan Hayes, VP of Global IT Service Excellence at Experian

Dynatrace provides software intelligence to simplify enterprise cloud complexity and accelerate digital transformation. With AI and complete automation, our all-in-one platform provides answers, not just data, about the performance of applications, the underlying infrastructure and the experience of all users. That’s why many of the world’s largest enterprises trust Dynatrace to modernize and automate enterprise cloud operations, release better software faster, and deliver unrivalled digital experiences.
