

Software intelligence for unbreakable continuous delivery

DevOps to NoOps using AI and automation

-  End-to-end coverage
-  Superior data collection
-  Causation-based AI engine
-  Quality, deployment and self-healing automation

What makes Dynatrace unique

Fully automated

With zero-touch configuration, continuous discovery and mapping, you can jump-start with out-of-the-box results.

Full stack

Automatically see all components and dependencies in real-time, including microservices running inside containers.

AI-powered

Powerful AI-driven software intelligence platform provides real-time precise data and contextual answers.

Broadest technology support

Engineered for cloud native and hybrid environments, Dynatrace covers your complete ecosystem automatically—from microservices to traditional applications.

Software Intelligence for unbreakable continuous delivery

All-in-one, AI-powered automation for the DevOps to NoOps cloud apps and infrastructure

The unique advantage of Dynatrace software intelligence for unbreakable continuous delivery

Being "cloud native" is not just architecture; it means bringing cloud-centric DevOps best practices to software and IT generally. Dynatrace's automated, full stack, AI-powered capabilities enable "as a service" features that improve four strategic areas for heightened speed, quality and performance, and a move to a more NoOps environment.

- Use monitoring strategically as a feature of the end-to-end pipeline
- AUTOMATE QUALITY: performance-gates-as-code — shift quality left and stop bad code before production
- AUTOMATE DEPLOYMENTS: validation-as-code — release higher quality applications more frequently
- AUTOMATE OPERATIONS: auto-remediation-as-code — self-heal bad deployments in production

"The AI paves the way for autonomous operations, enabling us to create auto-remediation workflows that remove the need for human intervention."

— Jonathan Hayes, VP of Global IT Service Excellence at Experian

Dynatrace provides software intelligence to simplify enterprise cloud complexity and accelerate digital transformation. With AI and complete automation, our all-in-one platform provides answers, not just data, about the performance of applications, the underlying infrastructure and the experience of all users. That's why many of the world's largest enterprises trust Dynatrace to modernize and automate enterprise cloud operations, release better software faster, and deliver unrivaled digital experiences.
