

Simply smarter, all-in-one platform powered by AI

- Application performance management
- Cloud infrastructure monitoring
- AIOps
- Digital experience management

## What makes Dynatrace unique

### Fully automated

With zero-touch configuration, continuous discovery and mapping, you'll have more time to do something useful.

### Full stack

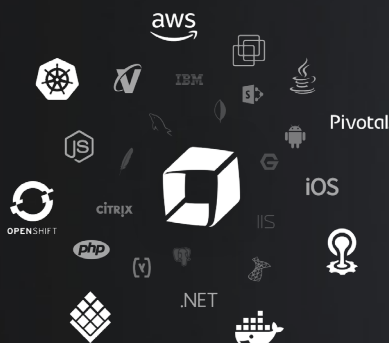

We understand all the relationships and interdependencies, top to bottom, so you don't have to.

### AI-powered

Powerful AI, providing real-time precise answers. Minimize troubleshooting, and spend more time knowing.

## Broadest technology support

Engineered for cloud native and hybrid environments, Dynatrace covers your complete ecosystem automatically – from microservices to traditional applications.

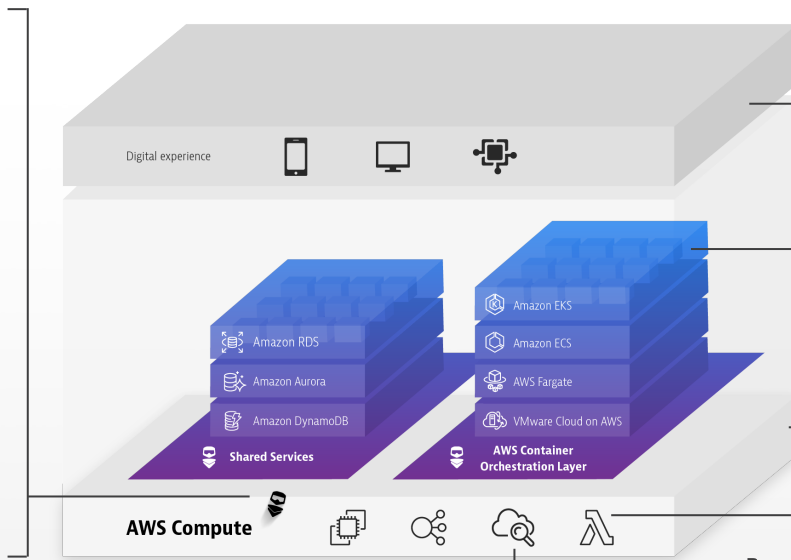

# Software Intelligence for AWS

All-in-one, AI-powered monitoring of AWS applications and infrastructure

**OneAgent** automatically provides full-stack visibility of applications and infrastructure

**Monitor, analyze and optimize** every digital interaction

**Continuous real-time auto discovery** through automatic OneAgent injection into containers

**Automatic and continuous deployment** of Dynatrace OneAgent to AWS components

**End-to-end tracing** of AWS Lambda functions and key AWS Lambda metrics

**Broad AWS technology** and service support, including complete Amazon CloudWatch metrics

## Dynatrace + AWS: The journey to NoOps

In 2016, Dynatrace disrupted itself to engineer a completely new monitoring platform purpose built to handle cloud, containers, and microservices via automation and deterministic AI at the core.

### Combining Dynatrace and AWS enables:

- **Release velocity**  
Major code releases every 2 weeks
- **Agility & resilience**  
5,000+ deployments per day across geo availability zones
- **Quality**  
93% reduction in production issues
- **Automation**  
Precise root-cause enables automated run books and workflows

**"Verizon saw vast improvement across its product lifecycle.** The speed and quality of its deployments has increased greatly and its time to revenue realization has been reduced."

- Anil Chintalapudi, Senior Technical Manager

Out of the box, Dynatrace provides **fully automated capabilities:**

- Monitoring of user experience, applications, AWS components, and hosts
- Distributed tracing of microservices
- Dependency discovery and topology mapping
- AI-powered problem detection and root-cause analysis

Monitor your AWS in minutes with the free Dynatrace trial: [www.dynatrace.com/trial](https://www.dynatrace.com/trial)

Dynatrace provides software intelligence to simplify enterprise cloud complexity and accelerate digital transformation. With AI and complete automation, our all-in-one platform provides answers, not just data, about the performance of applications, the underlying infrastructure and the experience of all users. That's why many of the world's largest enterprises trust Dynatrace to modernize and automate enterprise cloud operations, release better software faster, and deliver unrivaled digital experiences.
