

Simply smarter, all-in-one platform powered by AI

- Application performance management
- Cloud infrastructure monitoring
- AIOps
- Digital experience management

What makes Dynatrace unique

Fully automated

With zero-touch configuration, continuous discovery and mapping, you'll have more time to do something useful.

Full stack

We understand all the relationships and interdependencies, top to bottom, so you don't have to.

AI-powered

Powerful AI, providing real-time precise answers. Minimize troubleshooting, and spend more time knowing.

Broadest technology support

Engineered for cloud native and hybrid environments, Dynatrace covers your complete ecosystem automatically—from microservices to traditional applications.

Software Intelligence for Kubernetes Cluster & Workload Monitoring

All-in-one, AI-powered monitoring of Kubernetes clusters and applications

Kubernetes observability with Dynatrace

- Auto-injection into Docker, CRI-O and containerd
- Out-of-the-box code-level visibility inside containers
- Automatic distributed request and service tracing
- Dedicated Kubernetes cluster health and utilization monitoring

Deploying Dynatrace via the OneAgent Operator

- Makes full-stack, automated monitoring a platform feature
- Ensures every app and microservice you deploy is always monitored
- Eliminates the need to deploy, configure, and update agents
- Monitor 1000's of nodes and apps with ease

"Dynatrace's ability to give container level metrics and application performance with a single install **dramatically reduces the effort required** to maintain our environment."

—Mark Kaplan, IT Director, Barbri

Out of the box, Dynatrace provides **fully automated capabilities:**

- Monitoring of user experience, applications, Kubernetes clusters, and hosts
- Distributed tracing of microservices
- Dependency discovery and topology mapping
- AI-powered problem detection and root-cause analysis

Dynatrace provides software intelligence to simplify enterprise cloud complexity and accelerate digital transformation. With AI and complete automation, our all-in-one platform provides answers, not just data, about the performance of applications, the underlying infrastructure and the experience of all users. That's why many of the world's largest enterprises trust Dynatrace to modernize and automate enterprise cloud operations, release better software faster, and deliver unrivaled digital experiences.
