

# Dynatrace Application Monitoring

## Amazing WebUI and embedded expertise

Dynatrace AppMon provides end-to-end insight from user interaction down to the server call for every transaction, in real time, plus detects and diagnoses problems automatically.

Fact Sheet

## Scalable. Secure. Easy.

-  Fact-based collaboration between teams for fast problem resolution
-  Share relevant data across departments without limits using dashboards: out-of-the-box or employ powerful, easy customization
-  Deep database insights for Oracle (including Oracle RAC), Microsoft SQL Server, MySQL and IBM DB2
-  High transaction volume that scales with your business

*Know the flow and details of any transaction.*

## What's in it for me?

Supercharge your continuous delivery pipeline by fully automating analysis of millions of PurePaths™ across multiple deployments--using enhanced PurePath problem pattern detection based on extended time and deployment information. You get instant feedback on common issues, minimizing the chance of quality degradation.

Deep insights into every visit and action from the user perspective no matter which device type or browser, including W3C metrics and JavaScript error diagnostics.

Useful information on full method hotspots, exceptions and database diagnostics from PurePath in the WebUI that opens up the power of Dynatrace to everyone in your company and fosters collaboration.

The teamwork between the development team, operations, and the vendor is something difficult to do without Dynatrace in place."

— Edson Bagio, Project Manager, Whirlpool

Here at Pandora we're all about the user experience, so performance is extremely important. Dynatrace helps me to benchmark to make sure that everyone is meeting our SLA... and allows me to speak the [same] language with the engineering teams I'm working with."

— Michelle Mangum, Technical Lead, Pandora Ad Ops

# Support for the broadest range of technologies

AWS
