Hybrid cloud performance monitoring for Microsoft Azure
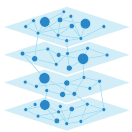

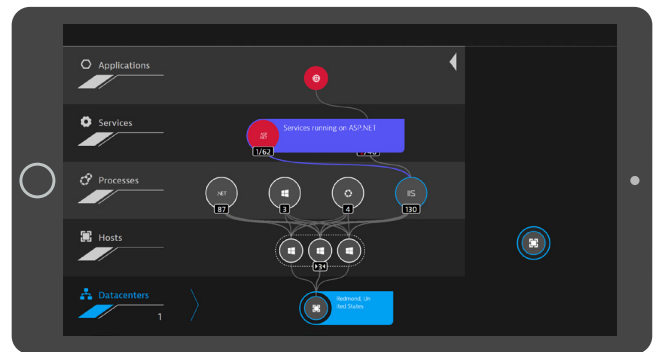

Start end-to-end monitoring in under 5 minutes!

- One-click installation, deployed from the Azure Marketplace
- No instrumentation, out of the box integration with Azure cloud services
- Real-time, automated monitoring
- Less noise, more problem solving with built-in AI

Fact Sheet

What is Dynatrace?

Dynatrace provides full stack, all-in-one monitoring and operations analytics for IT Ops, Performance Monitoring and DevOps teams working in startups, mid-sized companies and large organizations. Built with AI technology, Dynatrace enables companies to manage thousands of servers and applications with far less operational resources, and reduce MTTR.

Full stack availability and performance monitoring

Smart problem analysis powered by AI

Fully automated, no manual configuration

Full scalability – scales with your needs

What's in it for you?

- Real-time view of your entire technology stack in an all-in-one solution

- Faster problem resolution with automatic root cause analysis

- Reduced operational cloud costs by streamlining cloud resources

- Reduced cloud migration costs by moving faster to the cloud

> "
> Dynatrace has the strongest cloud integration capabilities on the market. A major reason why we chose it was because it offers out of the box integration with Microsoft Azure. I haven't seen another monitoring solution match this, or its AI-powered platform, that lets us see the full stack with such clarity."
>

Why customers like Dynatrace

- **Zero-admin, hands-free monitoring** automatically handles configuration and dashboard adjustment

- **Full stack visibility** from front-end to back-end and down to the underlying infrastructure layer increases simplicity and productivity

- **AI-powered root cause analysis** understands related alerts and sends a single, actionable problem notification

One comprehensive solution for hybrid application environments

Always be connected to your hybrid cloud environment

- Deploy Dynatrace on your terms: whether private, public or hybrid, you'll have permanent insight into your environment.

- Smartscape® provides a live-view of all your processes, services and hosts across all the environments from a single dashboard.

- The more complex and advanced your environment is, the more you'll benefit from Dynatrace.

## Innovate through AI-driven DevOps

- Monitor containers, microservices, clouds, databases, and legacy apps.

- Get full end-to-end visibility regardless of the physical, virtual, or cloud technology.

- Seamlessly integrate with your existing enterprise software delivery and management tools.

Benefit from the Dynatrace integration with native Azure cloud services

- Monitor Azure services like Compute, Storage, or Service Fabric.

- Integrate Dynatrace into Azure PaaS services: Web Apps, Cloud Services, IoT and Functions.

- Connect with on-premise solutions like the Azure Stack or VMware.

- Increase simplicity and visibility – one tool to monitor it all.

Dynatrace promises

- **Smart root cause analysis** powered by AI

- **Easy monitoring** with one click installation, no configuration

- **Future-proof** – built specifically for cloud native environments

- **Full scalability** – built with the largest environments in mind

Seamless out-of-the-box integration with your application environment

No matter which technology stack you build on or which container based technology you're using to orchestrate and manage your dynamic application environments on top of Microsoft Azure, Dynatrace seamlessly integrates, providing a holistic overview of your application, the technology stack, and your Azure cloud.
