dynatrace

Dynatrace for Software and Technology companies

Confident product delivery at speed and scale while elevating reliability and security

With Dynatrace, you can accelerate innovation to stay ahead of the competition:

Enhance your brand by ensuring high product reliability and security at scale

Manage rapid changes without compromising release quality and missing SLOs

Exceed customer expectations with real-time insights into end-to-end user experience

Realize ROI and drive efficiencies by optimizing cloud spend and automating manual processes

Boost engineering productivity and optimize CI/CD pipelines with intelligent DevSecOps automation

Why we're different

Best-in-class observability: Continuous visibility across your technology ecosystem with automatic dependency mapping for fast root-cause determination

Beyond data on dashboards: Precise AI-driven answers to proactively pinpoint issues before they impact users, and ensure a high level of reliability

Context-rich analytics: Contextually unify observability, security, and business data at scale and leverage massively parallel processing to power real-time insights

Intelligent DevSecOps automation: Leverage real-time insights to automate processes across the SDLC including notification, remediation, QA and delivery

Runtime application security: Empower security teams with a unique approach to securing cloud-native applications at runtime

Broadest technology support

We're open, extensible, and easily integrate with 600+ technologies

Cloud done right for Software and Technology companies

Staying competitive in today's market requires precise answers in real time and intelligent automation

Realize cloud deployment ROI, increase engineering productivity, and deliver secure, highly performing software with observability, application security, AI, and intelligent automation in one unified platform.

Dynatrace's software intelligence platform lets you:

- Innovate faster with reduced risk
- Ensure high reliability and availability
- Improve engineering productivity and retention

"Dynatrace is like a spider sitting in the middle of our operations web. It takes away all the white noise and provides real answers. Before, we had blind spots, but **with Dynatrace we can see everything.** The automation it provides gives us back time that we can invest into developing the features and services our customers expect."

— Reinhard Weber, Senior Product Manager,

SAP®

Out of the box Dynatrace provides **fully automated capabilities:**

- Observability as Code that fits into your GitOps strategy
- Shift left quality and security ensuring high-quality releases
- Automatic discovery of dependencies and AI-driven, real-time identification of issues with root-cause precision
- Lightning-fast analytics with an integrated and purpose-built massively parallel processing data lakehouse
- Proactive risk management with runtime vulnerability analysis and application protection
