Dynatrace full stack monitoring with built-in log analytics

Monitor and troubleshoot from one place with Dynatrace.

- Full stack application performance monitoring
- Log data and monitoring information available in same place in context
- Less noise, more problem solving with causation-based root cause analysis
- Zero manual configuration

What is Dynatrace?

Dynatrace provides full stack, all-in-one monitoring and operations analytics for IT Ops, Performance Monitoring and DevOps teams working in startups, mid-sized companies and large organizations. The only solution to provide log information in monitoring context, Dynatrace automatically discovers all log files on your monitored hosts and processes, and helps DevOps and QA teams perform their jobs quickly and efficiently.

What’s in it for you?

- Real-time view of your entire technology stack in an all-in-one solution
- Auto-detection and immediate analysis of interesting log files
- Faster problem resolution with automatic root cause analysis
- Seamless integration with your existing enterprise software delivery and management tools.

Dynatrace gives you the full picture of why your apps crashed and how to prevent it from happening again. It has also told us exactly how we’re using our environment, so we know what resources to move to the cloud for greater productivity and efficiency. You get instant value from Dynatrace."

— Nestor Zapata Lead Web Systems Administrator, Citrix
Dynatrace promises

- **Smart root cause analysis** powered by AI
- **Easy monitoring** with one click installation, no configuration
- **Future-proof** – built specifically for cloud native environments
- **Full scalability** – built with the largest environments in mind

Dynatrace Digital Performance Platform — it's digital business...transformed.
