

The public sector transforms faster with automatic and intelligent observability

U.S. public sector agencies — whether federal, state, local or education-based — are under increasing pressure to digitally transform operations and improve the vital services they provide to citizens and customers. Dynatrace software intelligence simplifies cloud complexities, boosts application security and accelerates the digital transformation.

With the deepest and widest hybrid and multi-cloud observability, continuous application security and powerful artificial intelligence for IT operations (AIOps), the Dynatrace software intelligence platform delivers precise answers about the performance and security of applications, the underlying infrastructure and the experiences of all users. It also enables IT, development, security, and business teams to automate cloud operations, release more secure software faster, and deliver unrivaled digital experiences.

So whether your agency or school system is migrating more workloads to the cloud, implementing a zero trust (ZT) security strategy or pursuing other modernization initiatives, Dynatrace is there to help you more effectively observe, identify and respond.

35 offices

11 labs

3600+ employees

*Statistics current as of October 2022

A unified platform

Leave the bag of tools behind. Tame modern cloud complexity and accelerate innovation with a single platform that is purpose-built to support the broadest array of BizDevSecOps use cases.

Infrastructure monitoring

Application & microservices monitoring

Application security

Digital experience monitoring

Business analytics

Cloud automation

Everything you need to tame the modern cloud

OneAgent

Continuous, automatic discovery and observability across the full stack.

Smartscape

Automatic, real-time topology and dependency mapping with context.

PurePath

End-to-end distributed tracing with code-level analysis.

Davis AI

Precise answers with root cause for enhanced performance and security in multicloud environments.

Grail

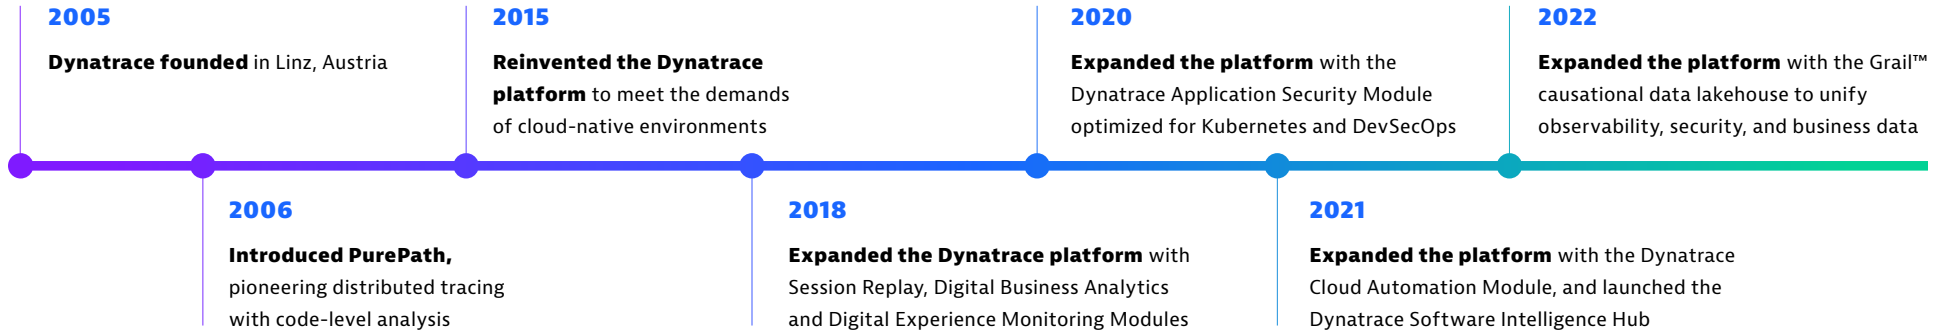

Unified observability, security, and business data with contextual analytics and massively parallel processing.

Hyperscale

Scalable across hundreds of thousands of hosts, millions of entities, and the largest multiclouds.

A bold history

Backed by powerful partnerships and integrations with 600+ technologies in our Software Intelligence Hub

A few of the many agencies that use Dynatrace:

A track record of recognition and results

“Dynatrace provided VA with an all-in-one platform built on a unified data model that delivers modern cloud stack observability at scale from the end-user experience to the health of our applications and infrastructure.”

— Dave Catanoso, Director, Enterprise Cloud Solutions Office (ECSO)

The Air Force 45th Test Squadron uses Dynatrace to test systems that supply real-time data needed to plan and execute missions. With millions of lines of code and highly complex applications **Dynatrace is able to detect, solve and optimize at scale to ensure mission success.**

- Named a Leader in the [2022 Gartner® Magic Quadrant™ for APM and Observability report](#), positioned with the furthest overall position for Completeness of Vision.
- Scored highest across 4 of 6 use cases in the [2022 Gartner® Critical Capabilities for APM and Observability report](#).
- Named a Leader with the top overall position in cloud-native observability and a Leader in cloud-native security in the [2022 ISG Provider Lens™ Cloud-Native Services and Solutions report](#).
- Named Leader in the [2022 GigaOm Radar for Observability Solutions report](#).

As digital transformation accelerates, the explosion of data and complexity that comes with moving to the cloud is increasingly challenging for organizations to manage. Dynatrace exists to make the world's software work perfectly. Our unified platform empowers organizations with answers and intelligent automation from data, enabling them to provide flawless and secure digital interactions. That is why the world's largest organizations trust the Dynatrace platform to deliver "cloud done right."
