Platform approach strongly preferred for hybrid cloud management

ESG InstaGraphic

80%

of organizations would **prefer** to manage the on-premises and public cloud components of their hybrid cloud ecosystem with a single vendor.

The platform approach to hybrid cloud management provides a single, consistent view and point of control spanning on-premises and public cloud-based resources as IT professionals look to reduce the complexity of enterprise cloud ecosystems. Simplified visibility enables businesses to make confident choices and respond quickly to change.
