

Insights into DevSecOps culture adoption in Financial Services organizations

IT leaders in banking and financial services face pressure to drive increased customer lifetime value (CLV) and revenue.

Here's how they're doing.

A global survey of 300 banking and financial services IT leaders shows that:

90% say digital transformation has accelerated in the past 12 months

26% expect it to continue to speed up in the future

The rate of system changes to deliver innovation is less frequent in banking environments than other financial services

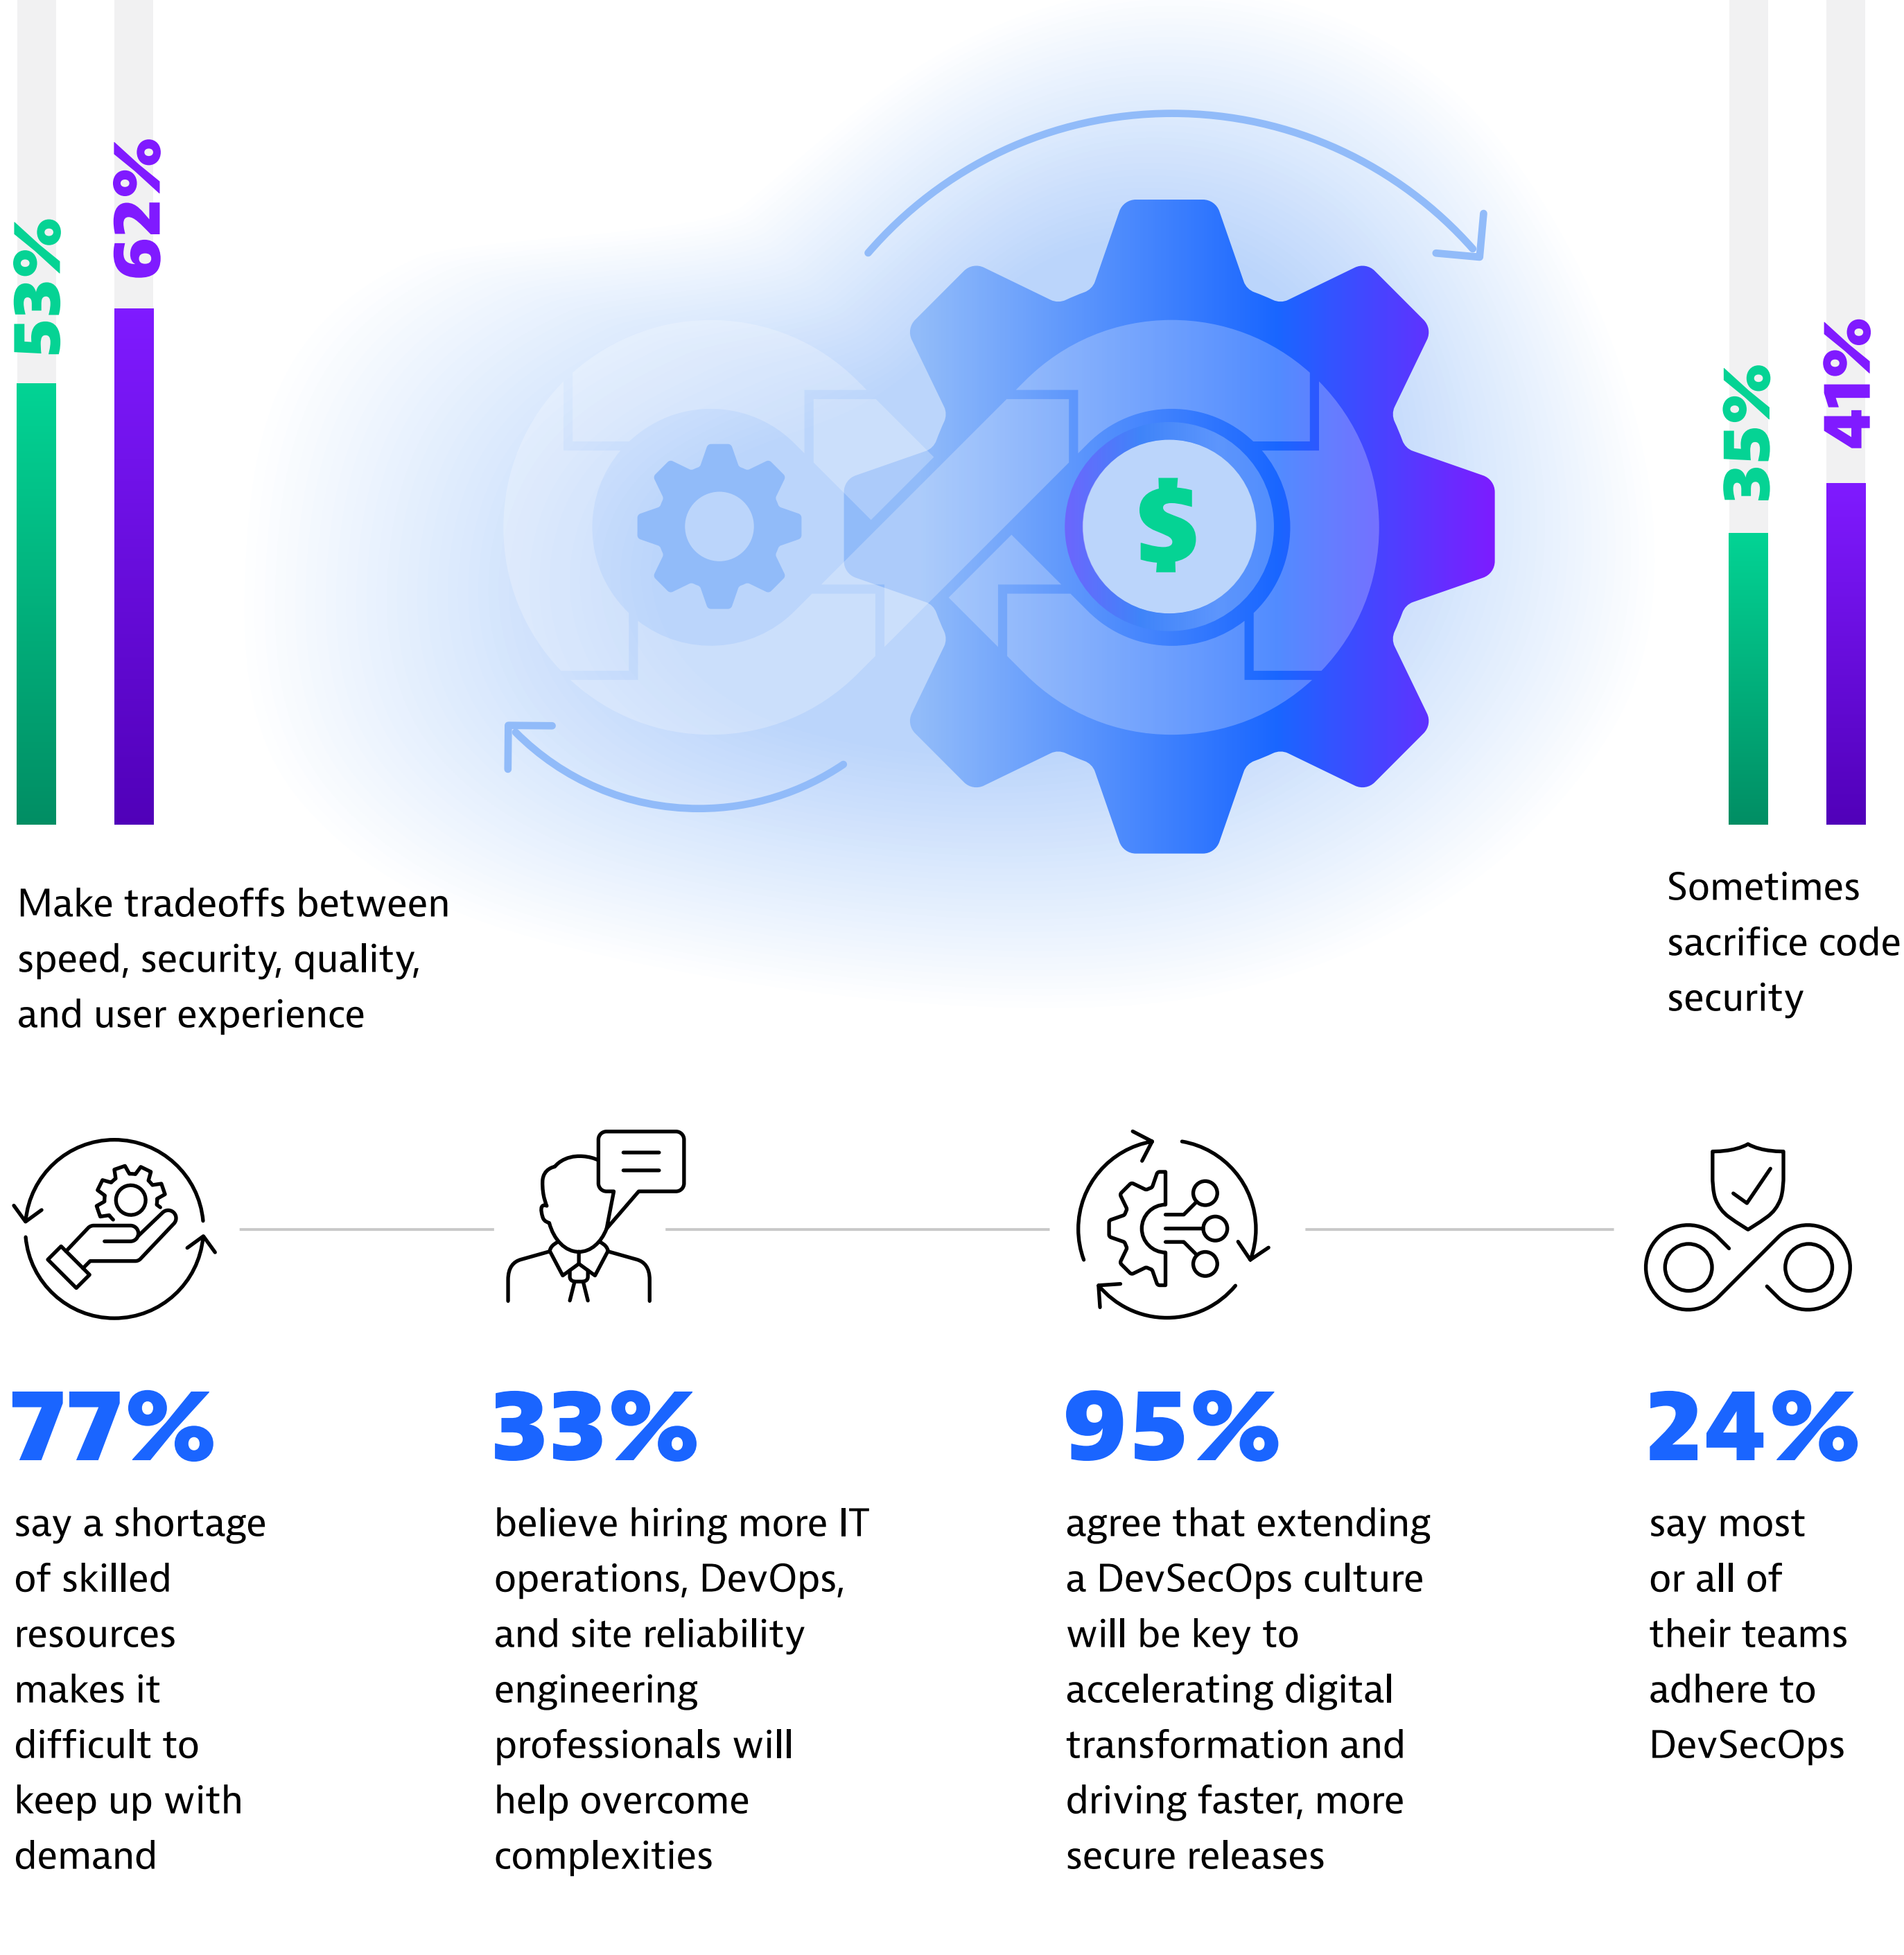

Banking

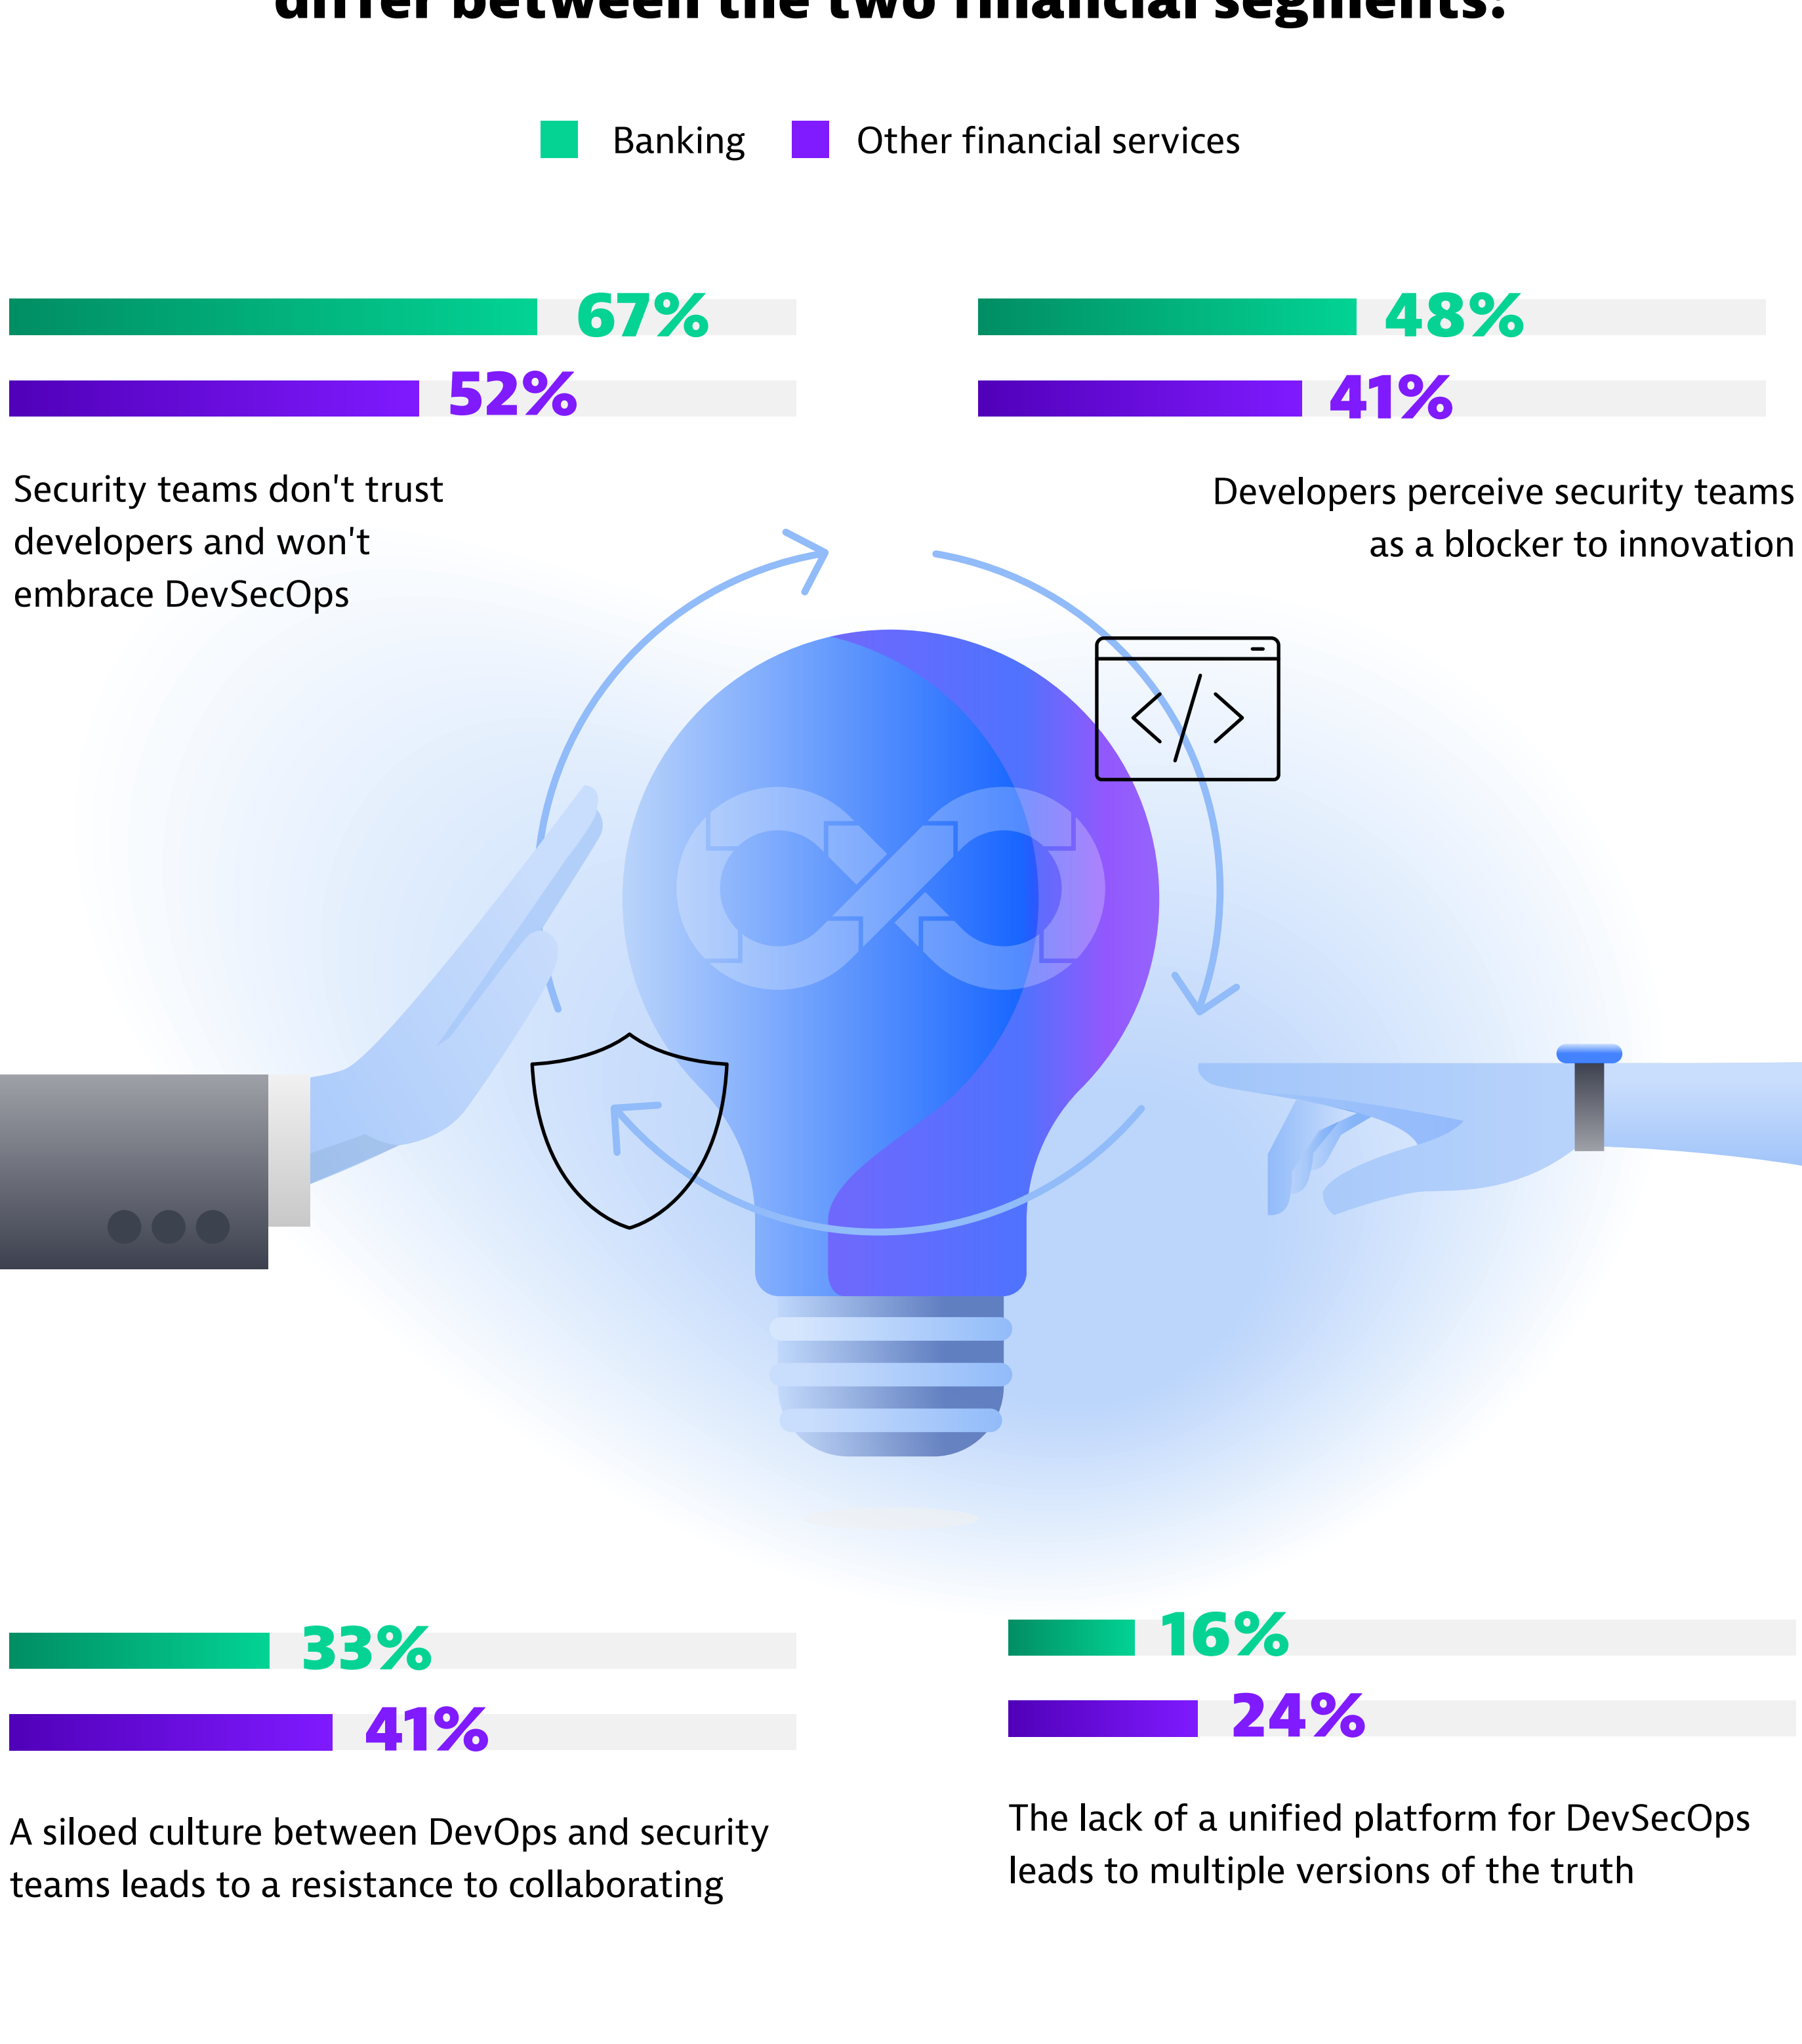

Every minute

Other financial services

Both segments find it challenging to keep up with the pace of innovation

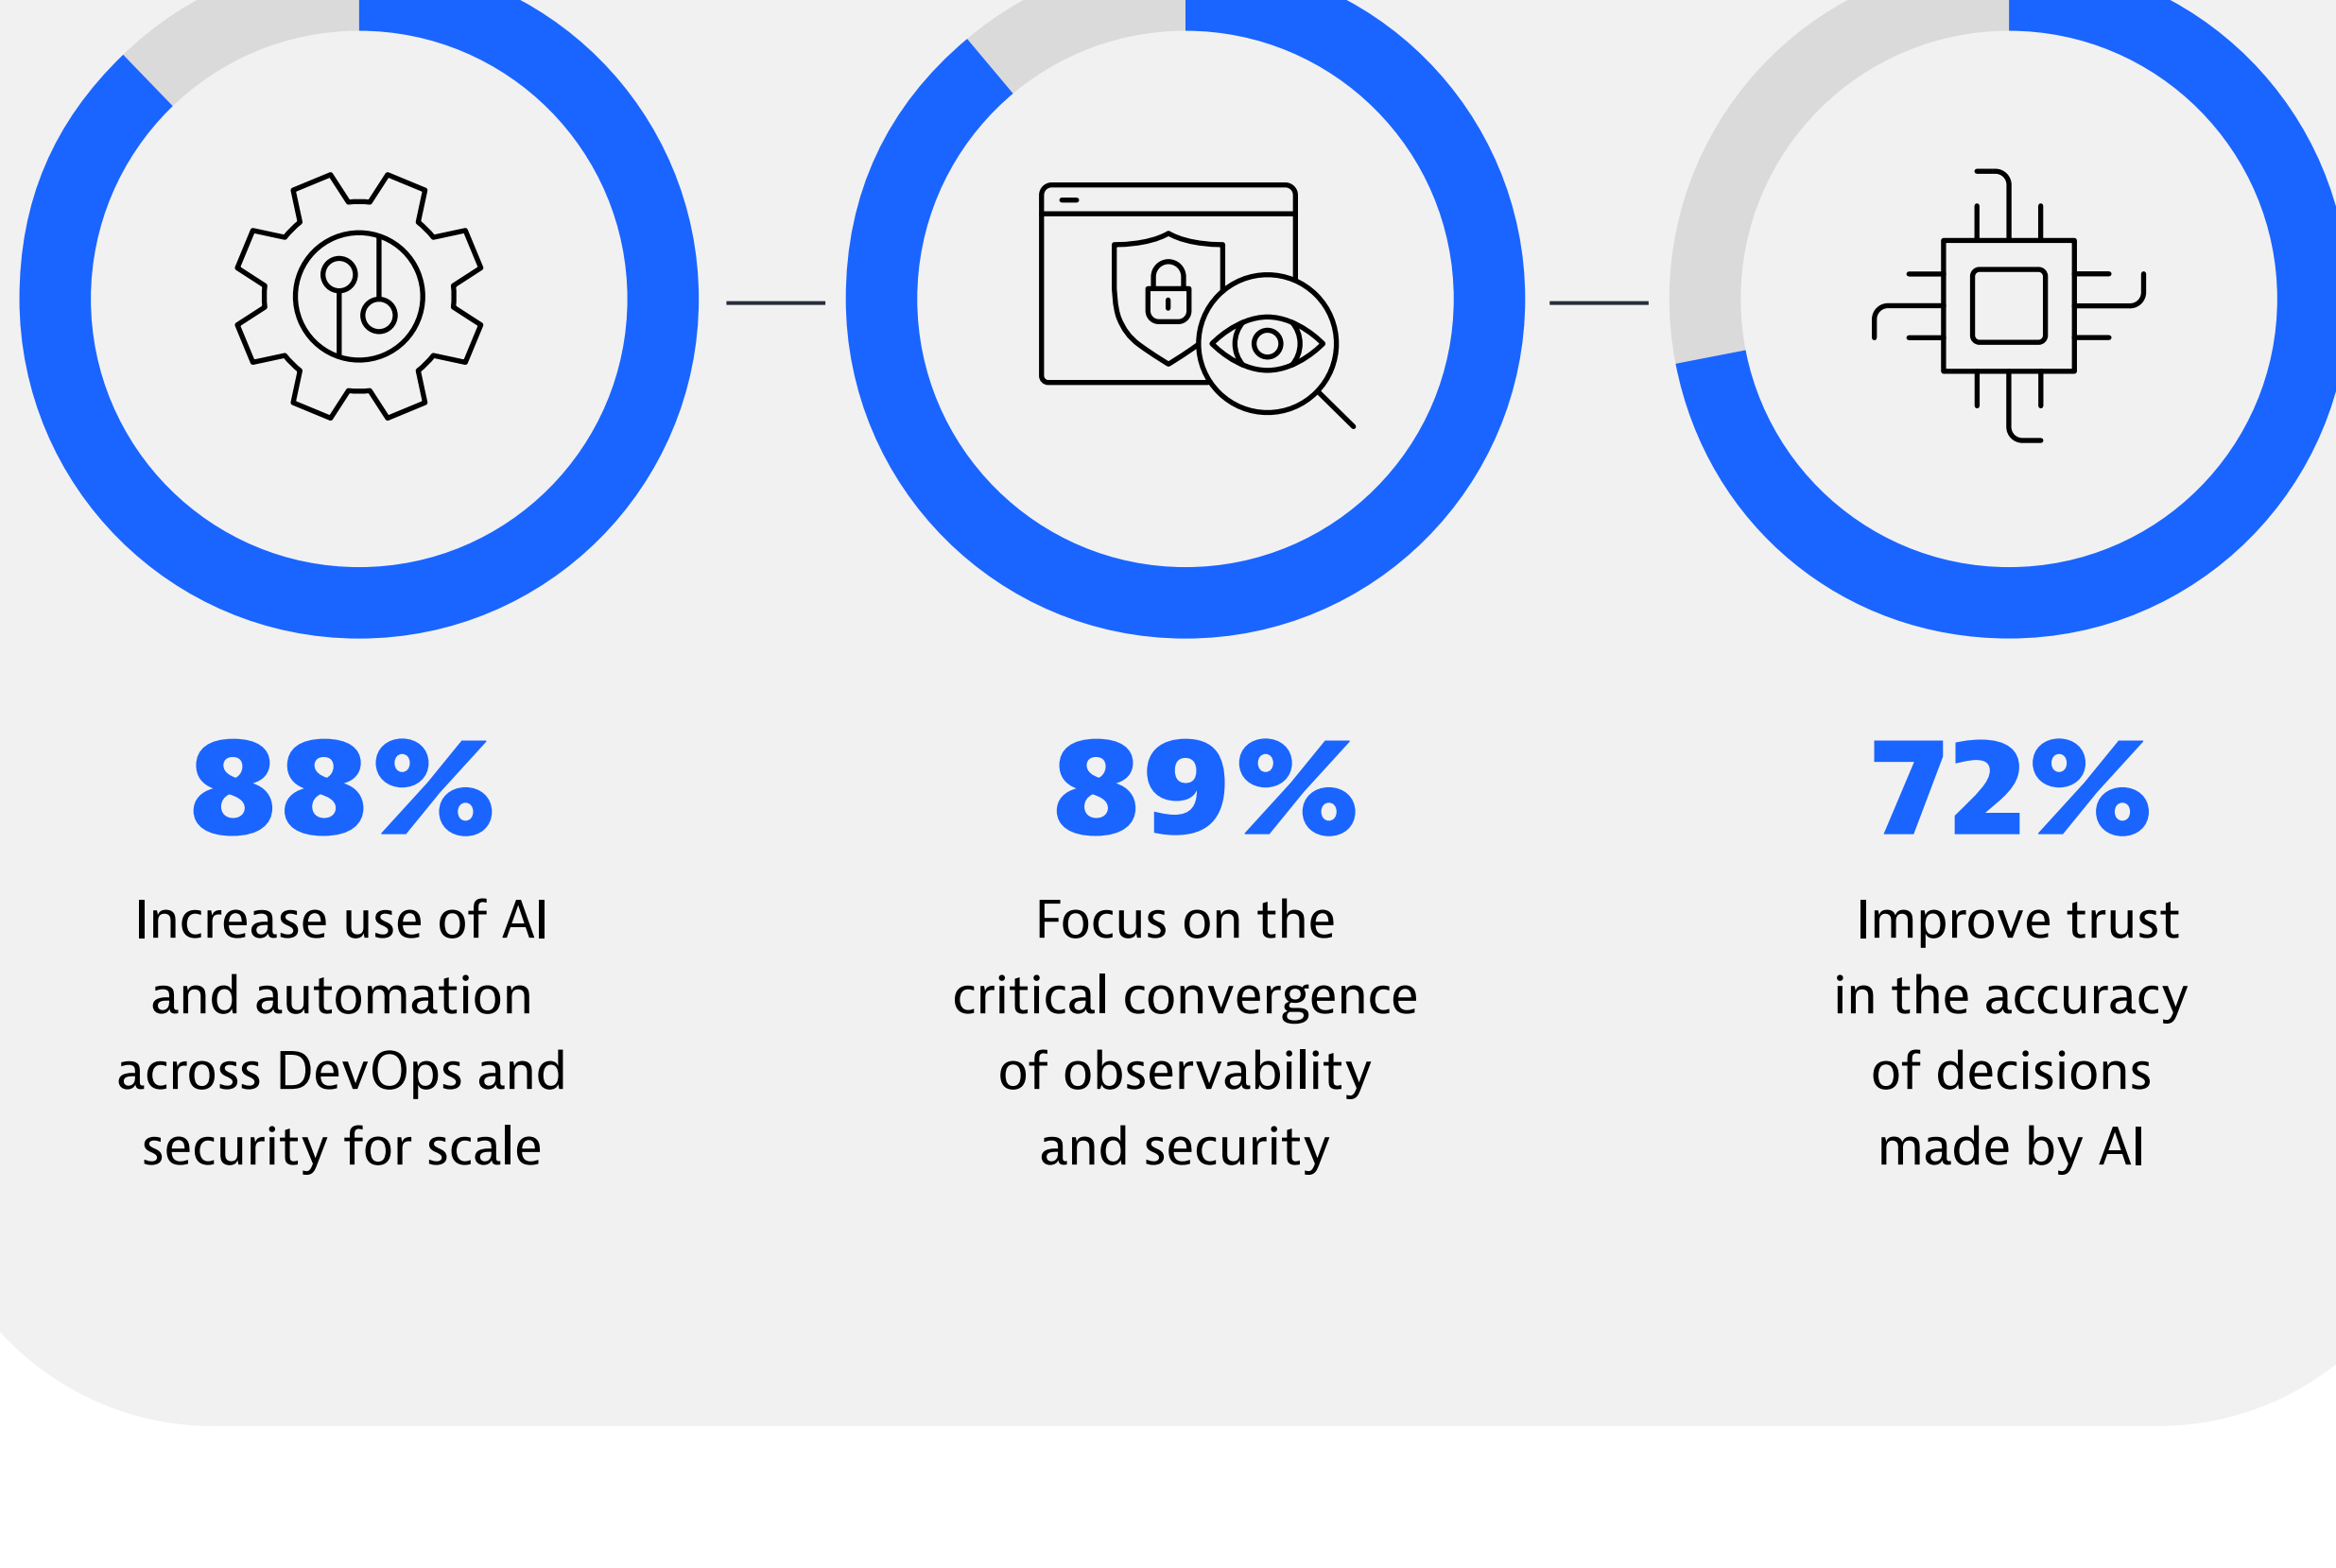

While barriers to adoption exist, perceptions differ between the two financial segments:

In spite of these challenges, IT leaders are making strides in DevSecOps investments:

To create a more successful DevSecOps culture, financial services IT leaders recommend:
