

Retailers must embrace DevSecOps to deliver a modern, resilient shopping experience

IT leaders in retail face pressure to deliver exceptional experiences, improve conversion rates, drive loyalty, and increase revenue.

Here's how they're doing.

Insights from a global survey of 151 retail IT leaders revealed the impact of digital transformation in the industry:

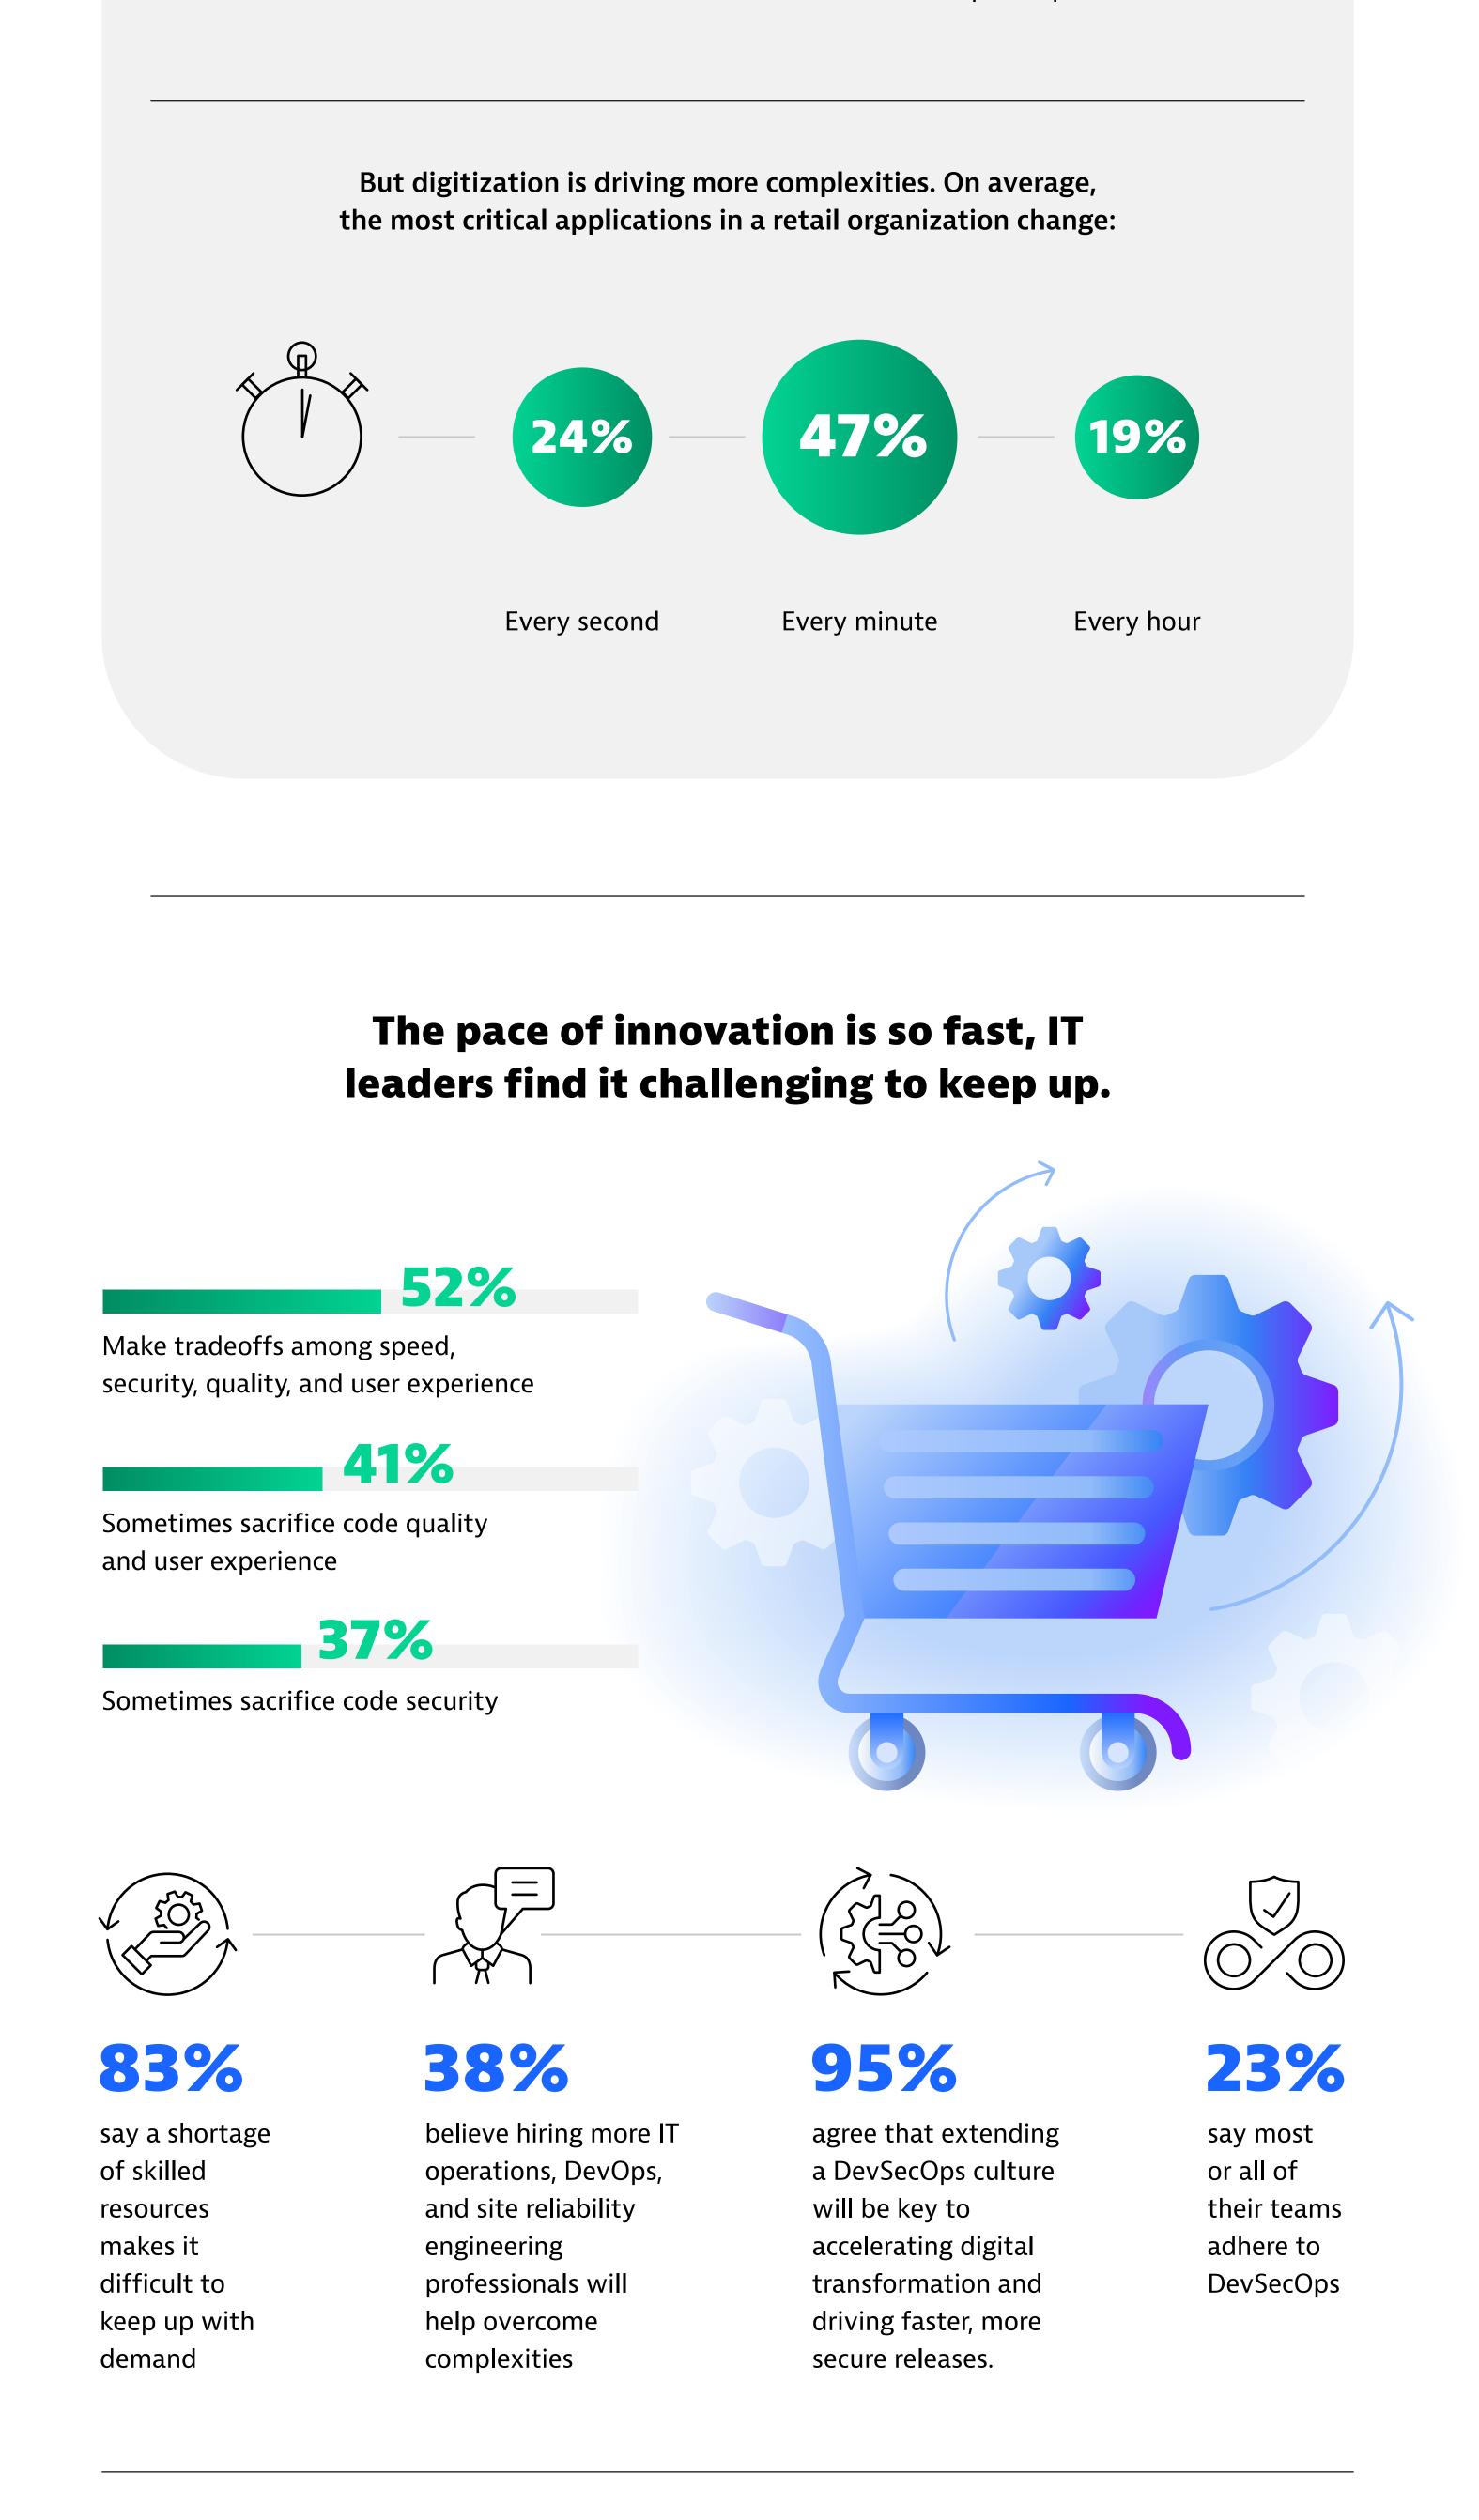

expect it to continue to

Barriers to adoption exist:

Security teams don't trust developers and won't embrace DevSecOps

A siloed culture between DevOps and security teams leads to resistance to collaborating

Developers perceive security teams as a blocker to innovation

The lack of a unified platform for DevSecOps leads to multiple versions of the truth

In spite of these challenges, IT leaders are making strides in DevSecOps investments:

Using shift-right security automation to continually detect and block vulnerabilities in production

50%

Continuously testing software quality and security in production (shift right)

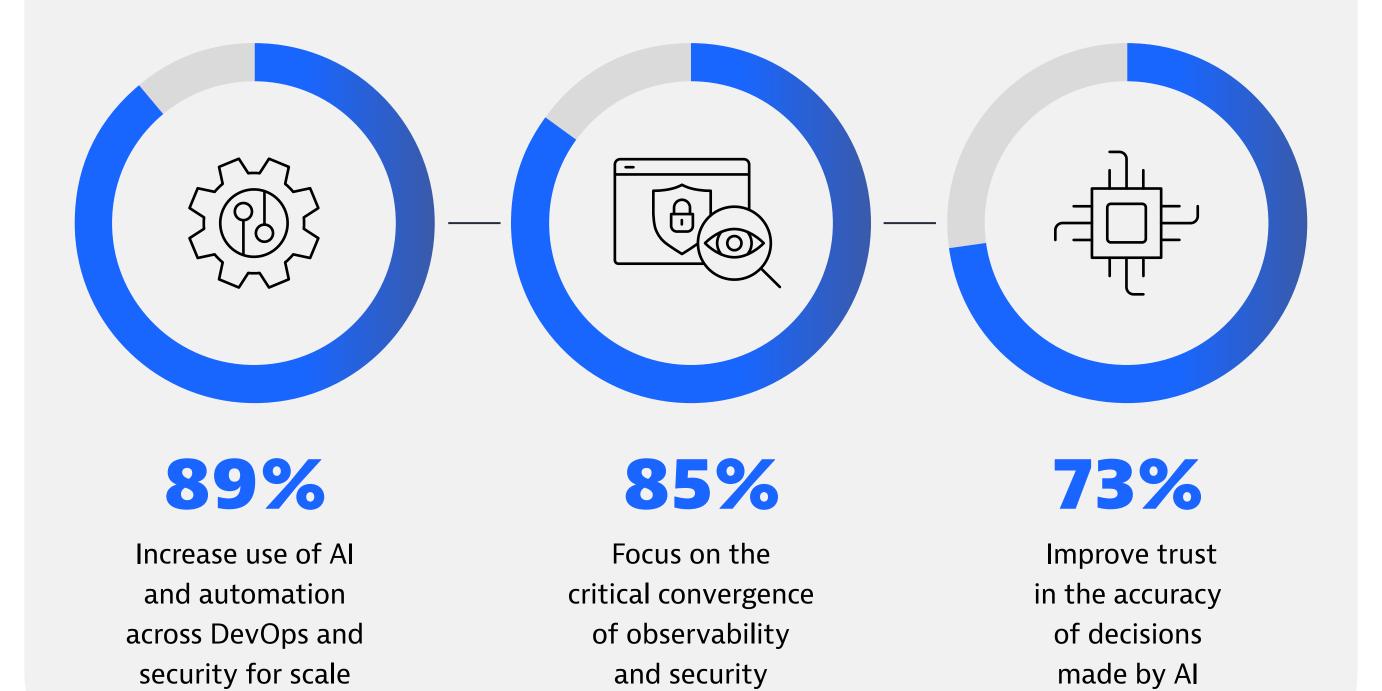

32%

Closely aligning business, development, security, and operations teams toward shared goals

AlOps-driven root-cause analysis

To create a more successful DevSecOps culture, retail IT leaders recommend:
