Application Performance Monitoring (APM) Software (continued)

Application Performance Monitoring (APM) Software Definition

Application performance monitoring (APM) tools allow users to monitor and track the performance of particular software or web applications to identify and solve any performance issues that may arise. These solutions provide performance metrics for applications, with specific insights into the statistics such as the amount of transactions processed by the application or the response time to process such transactions. APM products form a baseline for these metrics and monitor the applications for any variance from the baseline. The metrics are displayed in a variety of data visualizations for easy conceptualization of the overall performance. They are very commonly used by application administrators to manage web applications in hopes to discover possible reasons for delays in response time. With the ability to identify and fix any performance issues, businesses can provide an optimal user experience. Some APM solutions may offer similar functionality to [database management systems](#) and [network monitoring](#) solutions.

To qualify for inclusion in the Application Performance Monitoring category, a product must:

- ▶ Monitor and track the performance and response time of software or web applications
- ▶ Create a baseline of performance metrics and alert administrators when performance varies
- ▶ Provide visual data for users to better understand the performance metrics
- ▶ Assist in remedying any application performance issues

Application Performance Monitoring (APM) Grid® Scoring Description

Products shown on the Grid® for Application Performance Monitoring (APM) have received a minimum of 10 reviews/ratings in data gathered by June 01, 2021. Products are ranked by customer satisfaction (based on user reviews) and market presence (based on market share, seller size, and social impact) and placed into four categories on the Grid®:

- ▶ Products in the Leader quadrant are rated highly by G2 users and have substantial Market Presence scores. Leaders include: [Dynatrace](#), [AppDynamics](#), [Datadog](#), [LogicMonitor](#), [New Relic One](#), [Epsagon](#), [SolarWinds Server & Application Monitor](#), [Progress WhatsUp Gold](#), [Sumo Logic](#), [LogRocket](#), [Instana](#), [Microsoft System Center](#), [Veeam ONE](#), [Instabug](#), [Logz.io](#), and [Pulse Secure Virtual Traffic Manager](#)
- ▶ High Performing products have high customer Satisfaction scores and low Market Presence compared to the rest of the category. High Performers include: [Centreon](#), [FusionReactor APM](#), [Scout APM](#), [Atatus](#), [Serverless360](#), [Rollbar](#), [Lumigo](#), [Germain APM](#), [Raygun](#), [Lightstep](#), [Catchpoint](#), [Netreo](#), [Rigor](#), [IT-Conductor](#), and [Instrumental](#)
- ▶ Contender products have relatively low customer Satisfaction scores and high Market Presence compared to the rest of the category. While they may have positive reviews, they do not have enough reviews to validate those ratings. Contenders include: [PRTG Network Monitor](#), [Splunk APM](#), [SolarWinds Web Performance Monitor](#), [dotMemory](#), [Google Cloud Console](#), [Azure Monitor](#), [Micro Focus SiteScope](#), [Google Cloud Monitoring](#), [dotTrace](#), [Zabbix](#), and [Micro Focus Operations Bridge \(OpsBridge\)](#)
- ▶ Niche products have relatively low Satisfaction scores and low Market Presence compared to the rest of the category. While they may have positive reviews, they do not have enough reviews to validate those ratings. Niche products include: [Nagios XI](#), [SolarWinds Standard Toolset](#), [Netdata](#), [Anodot](#), [Retrace](#), [Pepperdata Cloud Performance](#), [Icinga Infrastructure Monitoring](#), and [AppOptics](#)

Grid® Scores for Application Performance Monitoring (APM) Software

The table below shows the Satisfaction and Market Presence scores that determine seller placement on the Grid®. To learn more about each of the products, please see the product profile section.

Leaders

	# of Reviews	Satisfaction	Market Presence	G2 Score
Dynatrace	796	97	99	98
AppDynamics	228	82	93	88
Datadog	197	68	93	80
LogicMonitor	104	91	70	80
New Relic One	247	62	88	75
Epsagon	57	94	54	74
SolarWinds Server & Application Monitor	234	67	81	74
Progress WhatsUp Gold	108	82	65	74
Sumo Logic	123	72	74	73
LogRocket	75	94	50	72
Instana	72	78	58	68
Microsoft System Center	250	52	82	67
Veeam ONE	57	74	57	66
Instabug	122	71	57	64
Logz.io	41	70	53	61
Pulse Secure Virtual Traffic Manager	61	59	55	57

(Grid® Scores for Application Performance Monitoring (APM) Software continues on next page)

* Products are ordered by G2 Score. Satisfaction score is used as a tiebreaker if two products have the same G2 Score.

Grid® Scores for Application Performance Monitoring (APM) Software (continued)

Pepperdata	12	33	26	30
Icinga Monitoring	17	25	27	26
SolarWinds Appoptics	14	8	40	24

* Products are ordered by G2 Score. Satisfaction score is used as a tiebreaker if two products have the same G2 Score.

Grid® Methodology

Grid® Rating Methodology

The Grid® represents the democratic voice of real software users, rather than the subjective opinion of one analyst. G2 rates products from the Application Performance Monitoring (APM) category algorithmically based on data sourced from product reviews shared by G2 users and data aggregated from online sources and social networks.

Technology buyers can use the Grid® to help them quickly select the best products for their businesses and to find peers with similar experiences. For sellers, media, investors, and analysts, the Grid® provides benchmarks for product comparison and market trend analysis.

Grid® Scoring Methodology

G2 rates products and sellers based on reviews gathered from our user community, as well as data aggregated from online sources and social networks. We apply a unique algorithm (v3.0) to this data to calculate the Satisfaction and Market Presence scores in real time. The Grid® Report for Application Performance Monitoring (APM) | Summer 2021 is based on scores calculated using the G2 algorithm v3.0 from reviews collected through June 01, 2021. To view the Application Performance Monitoring (APM) Grid® with the most recent data, please visit the [Application Performance Monitoring \(APM\)](#) page.

Satisfaction

The Satisfaction rating is affected by the following (in order of importance):

- ▶ Customer satisfaction with end user-focused product attributes based on user reviews
- ▶ Popularity and statistical significance based on the number of reviews received by G2
- ▶ Quality of reviews received (reviews that are more thoroughly completed will be weighted more heavily)
- ▶ Age of reviews (more-recent reviews provide relevant and up-to-date information that is reflective of the current state of a product)
- ▶ Customers' satisfaction with administration-specific product attributes based on user reviews
- ▶ Overall customer satisfaction and Net Promoter Score® (NPS) based on ratings by G2 users

Note: The customer satisfaction score is normalized for each Grid®, meaning the scores are relative.

(Grid® Methodology continues on next page)

**Net Promoter, Net Promoter System, Net Promoter Score, NPS and the NPS-related emoticons are registered trademarks of Bain & Company, Inc., Fred Reichheld and Satmetrix Systems, Inc.

Grid® Methodology (continued)

Market Presence

The Market Presence score is affected by the following (in order of importance):

- ▶ Market presence is a combination of 15 metrics from G2's reviews, publicly available information, and third-party sources
- ▶ Both the software sellers and the individual products are measured on various criteria. The criteria are listed in order of importance. Products metric receive greater weight than seller metrics

Criteria	Measured For		Metrics
	Product	Seller	
Number of Employees	✓	✓	Employee Count (based on social networks and public sources)
Reviews	✓		Review Count (weighted by recency)
Web Presence	✓	✓	
Social Presence	✓	✓	
Growth	✓	✓	Employee Growth, Web Presence Growth
Seller Age		✓	
Employee Satisfaction and Engagement		✓	

- ▶ Each input is normalized by category and segment. This means that scores are relative to other products in the category/segment and may change from segment to segment
- ▶ The scores are then scaled from 0-100

Grid® Categorization Methodology

Making G2 research relevant and easy for people to use as they evaluate and select business software products is one of our most important goals. In support of that goal, organizing products and software companies in a well-defined structure that makes capturing, evaluating, and displaying reviews and other research in an orderly manner is a critical part of the research process.

To manage the process of categorizing the software products and the related reviews in the G2 community, G2 follows a publicly available categorization methodology. All products appearing on the Grid® have passed through G2's [categorization methodology](#) and meet G2's category standards.

Many terms that appear regularly across G2 and are used to aid in product categorization warrant a definition to facilitate buyer understanding. These terms may be included within reviews from the G2 community or in executive summaries for products included on the Grid®. A [list of standard definitions](#) is available to G2 users to eliminate confusion and ease the buying process.

(Grid® Methodology continues on next page)

Grid® Methodology (continued)

Rating Changes and Dynamics

The ratings in this report are based on a snapshot of the user reviews and social data collected by G2 up through June 01, 2021. The ratings may change as the products are further developed, the sellers grow, and as additional opinions are shared by users. G2 updates the ratings on its website in real time as additional data is received, and this report will be updated as significant data is received. By improving their products and support and/or by having more satisfied customer voices heard, Contenders may become Leaders and Niche sellers may become High Performers.

Trust

Keeping our ratings unbiased is our top priority. We require the use of a LinkedIn account or verified business email address to validate a G2 user's identity and employer. We also validate users by partnering with sellers and organizations to securely authenticate users through select platforms. We do not allow users to review their current or former employers' products, or those of their employers' competitors. Additionally, all reviews are manually checked by our team after our algorithm filters out reviews that don't meet our submission requirements. All reviews must pass our moderation process before they are published.

Our G2 staff does not add any subjective input to the ratings, which are determined algorithmically based on data aggregated from publicly available online sources and social networks. Sellers cannot influence their ratings by spending time or money with us. Only the opinion of real users and data from public sources factor into the ratings.

Grid® Inclusion Criteria

All products in a G2 category that have at least 10 reviews from real users of the product are included on the Grid®. Inviting other users, such as colleagues and peers, to join G2 and share authentic product reviews will accelerate this process.

If a product is not yet listed on G2 and it fits the market definition above, then users are encouraged to [suggest its addition](#) to our [Application Performance Monitoring \(APM\) category](#).

Product Profiles

Product profiles and detailed charts are included for products with 10 or more reviews.

dynatrace

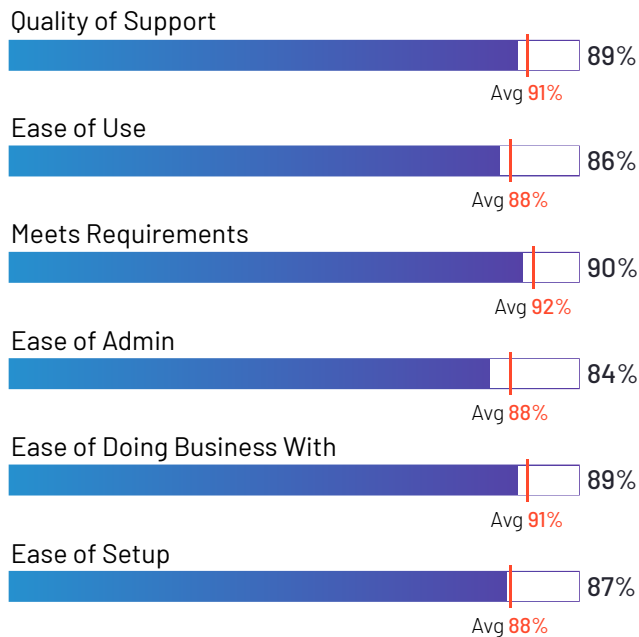

Dynatrace

4.5 ★★★★★ (1,023)

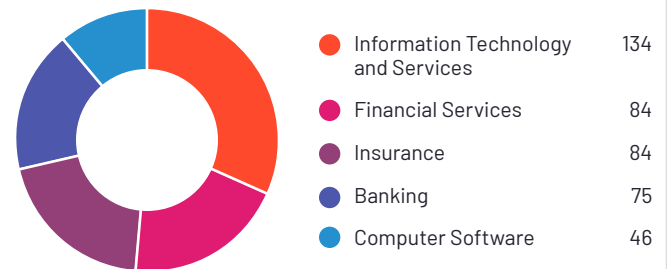

Dynatrace has been named a Leader based on receiving a high customer Satisfaction score and having a large Market Presence. Dynatrace has the largest Market Presence and received the highest Satisfaction score among products in Application Performance Monitoring (APM). 98% of users rated it 4 or 5 stars, 95% of users believe it is headed in the right direction, and users said they would be likely to recommend Dynatrace at a rate of 90%. Dynatrace is also in the Network Monitoring, Incident Response, Log Analysis, Container Monitoring, IT Alerting, Session Replay, ServiceNow Store Apps, Runtime Application Self-Protection (RASP), Cloud Infrastructure Monitoring, Website Monitoring, Digital Experience Monitoring (DEM), Database Monitoring, AIOps Platforms, Log Monitoring, Enterprise Monitoring, SAP Store, and Digital Employee Experience (DEX) Management categories.
