

Beyond APM. All-in-one.

Software intelligence for the enterprise cloud

-  Application performance management
-  Cloud infrastructure monitoring
-  AIOps
-  Digital experience management

What makes Dynatrace unique

Fully automated

With zero-touch configuration, continuous discovery and mapping, you'll have more time to do something useful.

Full stack

We understand all the relationships and interdependencies, top to bottom, so you don't have to.

AI-powered

Powerful AI, providing real-time precise answers. Minimize troubleshooting, and spend more time knowing.

Broadest technology support

Engineered for cloud native and hybrid environments, Dynatrace covers your complete ecosystem automatically—from microservices to traditional applications.

Beyond APM for Pivotal Cloud Foundry

Pivotal

PREMIER

All-in-one, AI-powered monitoring of PCF applications and infrastructure

OneAgent deploys automatically via BOSH to all layers and technologies in your environment

Monitor, analyze and optimize every digital interaction

Real-time auto discovery through OneAgent injection of PAS and PKS containers without code or image changes

Automatic and continuous deployment of Dynatrace OneAgent to all components

Full integration with all major cloud platforms

The unique advantage of Dynatrace deployed by BOSH

BOSH is the powerful backbone of PCF that enables the deployment of infrastructure and application components across thousands of VMs and multiple clouds automatically.

Deploying Dynatrace via the BOSH add-on:

- Makes full-stack, automated monitoring a platform feature
- Ensures every app and microservice you deploy is always monitored
- Eliminates the need to deploy, configure, and update agents
- Scales across 100's or 1,000's of nodes and apps with ease

"We have a very powerful engineering platform in PCF and a very powerful monitoring platform in Dynatrace. **Pairing them together has been tremendously beneficial.**"

—Bob Johnson, Associate VP, High Performance Engineering & DevOps

Humana

Out of the box, Dynatrace provides **fully automated capabilities:**

- Monitoring of user experience, applications, PCF components, and hosts
- Distributed tracing of microservices
- Dependency discovery and topology mapping
- AI-powered problem detection and root-cause analysis

Dynatrace provides software intelligence to simplify enterprise cloud complexity and accelerate digital transformation. With AI and complete automation, our all-in-one platform provides answers, not just data, about the performance of applications, the underlying infrastructure and the experience of all users. That's why many of the world's largest enterprises trust Dynatrace to modernize and automate enterprise cloud operations, release better software faster, and deliver unrivalled digital experiences.
